

ProSeries

62" GrabPro Grapple

SEE IT IN ACTION

Grapple Rake Highlights

- ▶ The heavy duty 62" grapple rake makes easy work of picking up and moving rocks, logs, brush, construction and demolition debris and other odd shaped, hard to lift objects.
- ▶ High-strength grade 80 steel tines provide higher strength than common steel. Professional strength with less weight for heavier payloads.
- ▶ Each grapple has its own cylinder, enabling them to operate independently to secure uneven shapes and sizes, preventing load loss.
- ▶ 2.5" grapple cylinders provide the clamping force to pick up and hold loads securely.
- ▶ The hydraulic hoses are routed through the grapple frame to protect them from damage, reducing costly repairs, down time and oil leak cleanup.
